

SLIMLINE PATIO DOOR LOCK

Featuring a four point hook locking system, anti slam pins and an advanced bi-directional gearbox, the slimline lock offers exceptional security for patio doors.

The slimline lock has been designed to fit most 16mm eurogroove applications. Locating pins are situated on both the face bar and one-piece keep to ensure accurate alignment.

Rollers have been designed specifically to fit into any standard eurogroove and suit all 4, 5 and 6mm diameter tracks. Adjustment is simply via the roller's end screw, allowing 7mm height adjustment if needed.

Tandem wheels help spread the load of the door. One set of rollers will hold a door weight of up to 80kg.

Complementary handles are available in four finishes: polished gold, polished chrome, white and black. Suitable for use with standard euro-cylinders.

Technical information

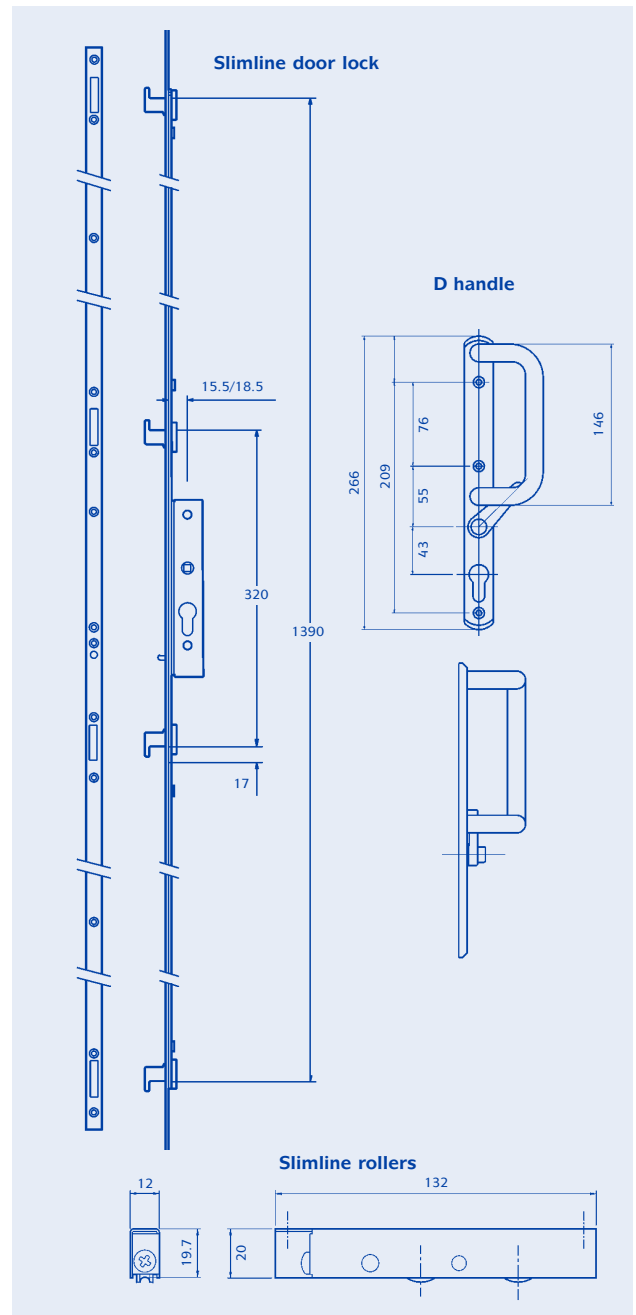

Corrosion resistance:	Meets the Requirements of BS EN 7412
Operation:	Lock - Cycle tested to over 20,000 cycles
