- Suitable for PVC-u, aluminium, composite and timber doors
- 10 year performance guarantee

## Revolutionary Design

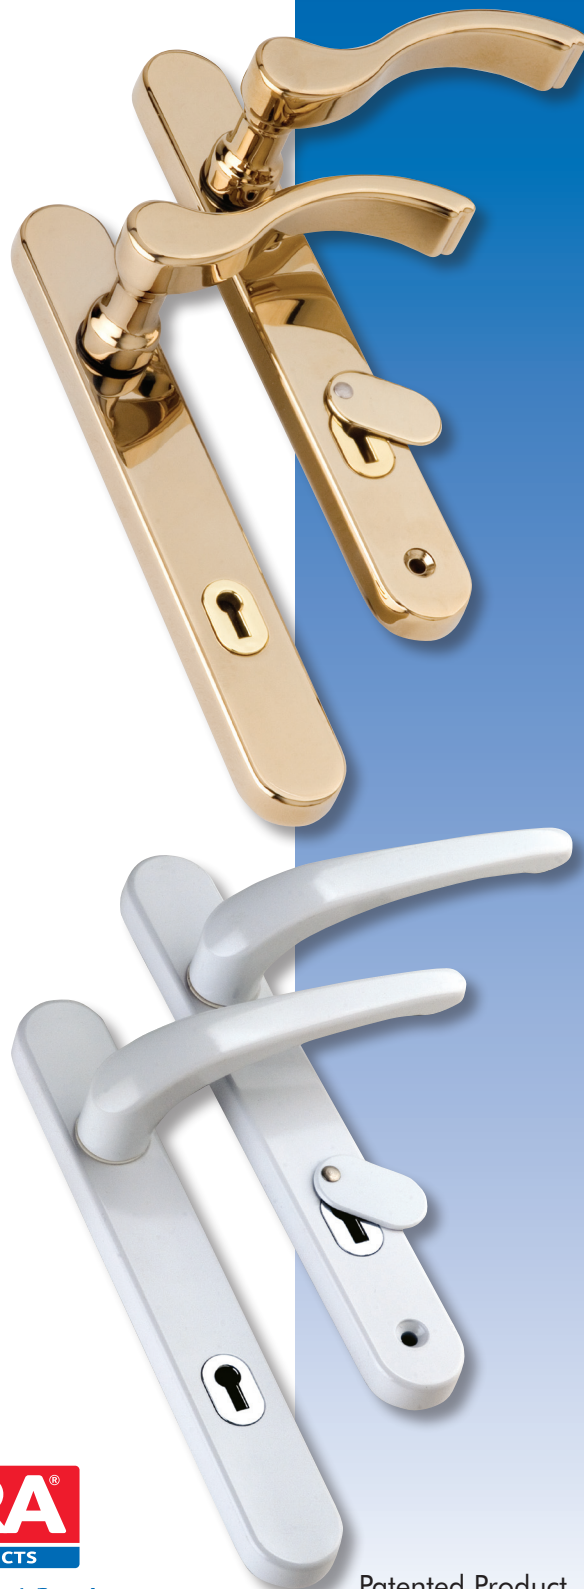

Vectis Plus is a unique range of door furniture that combines stylish design with traditional key locking to suit the new Vectis Plus multi-point locking system.

Designed with a traditional twist on the modern handle, the introduction of a new escutcheon cover enhances traditional styling internally, while maintaining modern external aesthetics.

With a unique patented integral shutter system; the Vectis Plus door furniture range ensures excellent weather sealing and has been designed and tested to meet the requirements of PAS 023 – air, wind and water tests. The internal escutcheon cover acts as a barrier against the elements, enhancing the existing PAS 023 protection of the shutter system.

Designed with a patented internal key guide mechanism to guide the key into the lock, operation is made simple for the user.

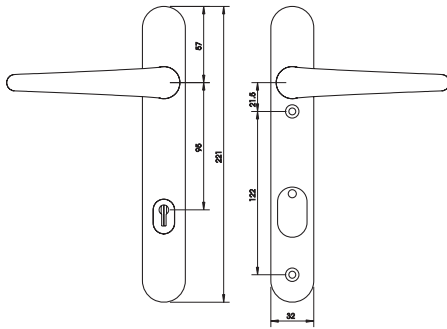

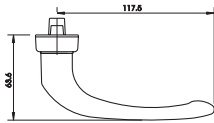

Featuring an ergonomically solid grip and a softly rounded back plate; handles are available in PVD Gold, Polished Chrome, powder coated white and black finishes.
