

VECTIS PLUS+

CYLINDER-FREE
Multi Point Locking

from

The Door Lock People

No euro cylinder, so...

- No bumping
- No breaking/snapping
- No plug extraction

Patented Product

**VECTIS
PLUS +**

CYLINDER-FREE Multi Point Locking

The Multi Point Locking market is a highly competitive market place with many 'similar' products; product differential is vital.

ERA has developed the next generation in Multi Point Locking; VECTIS PLUS - the Cylinder Free Multi Point Lock, first to market with hardened plates giving enhanced strength against attack.

The patented VECTIS PLUS encompasses ERA's traditional lever technology used in mortice locks for centuries; combined with today's need for modern locking systems.

Secured by Design

Police Preferred Specification

The VECTIS PLUS is designed to meet the requirements of PAS 23/24 & Secured by Design.

Benefits of VECTIS PLUS:

- Patented 5 Lever operation eliminates the need for euro cylinder operation.
No euro cylinder means the VECTIS PLUS is free from cylinder manipulation, breaking/snapping and plug extraction
- Door fabrication is made easier and quicker for the installer
- VECTIS PLUS can be keyed alike to ERA's mortice lock range; allowing a Multi Point Lock on the front door and a mortice lock on the back door both using the same key

Product Specification:

- VECTIS PLUS is available in the following backsets:
 - 35mm Backset – with centre hook and deadbolt option
 - 35mm Slave unit
 - 45mm Backset – with deadbolt option only
- All gearboxes are supplied with 3 x brass keys
