

SARACEN 6000 3 Hook 4 Roller

multi-point door lock

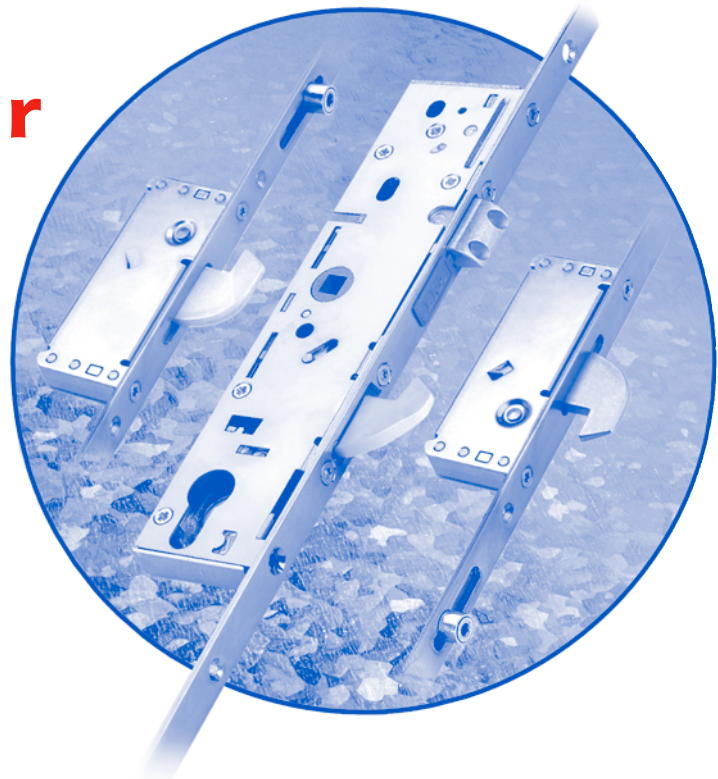

The lock has 3 hooks and 4 roller cams for enhanced performance and weather sealing.

The rollers ensure precise compression of the weather seal and door alignment in the frame, while the hooks offer extra security.

The bi-directional hooks ensure maximum resistance to anti-lift and separation providing a secure barrier against forced entry.

The central gearbox, available in two backsets, has a robust central hook with a snib facility on the reversible sash (latch) bolt. A split spindle option allows for back or front door operation on the same lock.

Complementary door furniture, cylinders, letterplates and hinges available.
