#### FOR SINGLE OR DOUBLE DOORS

Fixing is simple and the one design suits clockwise or anticlockwise closing doors. There are no springs and no loose parts to be mislaid, whilst all steel-construction means perfect service for many years with easy swivelling at joints under any climatic conditions. The stop functions automatically when the door is pushed fully open. To close, it is only necessary to give the acorn pendant a short pull; this raises the catch and allows the door to be closed. The cord is for operating the catch only and should not be pulled to close the door. Supplied complete with fixing screws and bolts.

**\*1015-10 - Light door holder ideal for single internal and external doors only. Also suitable for garden sheds, outbuildings etc.**

## BRACKETS

### 236 Handrail Bracket - Steel
