

**BLOCK
LOCK**

BLOCK LOCK

The ERA Block Lock is the innovative solution for additional security to safeguard van contents. The Block Lock is easily portable, it can be used on vans, sheds and caravans and no drilling is required. The Block Lock can be fitted in minutes.

One half of the lock, the bracket, is attached to one of the rear doors. The doors are then closed and the locking mechanism is attached to the bracket so that the doors are prevented from opening. The lock uses an oval single cylinder and is opened by key.
