

# SECURISTYLE VECTOR EXCLUDER

extra security for windows

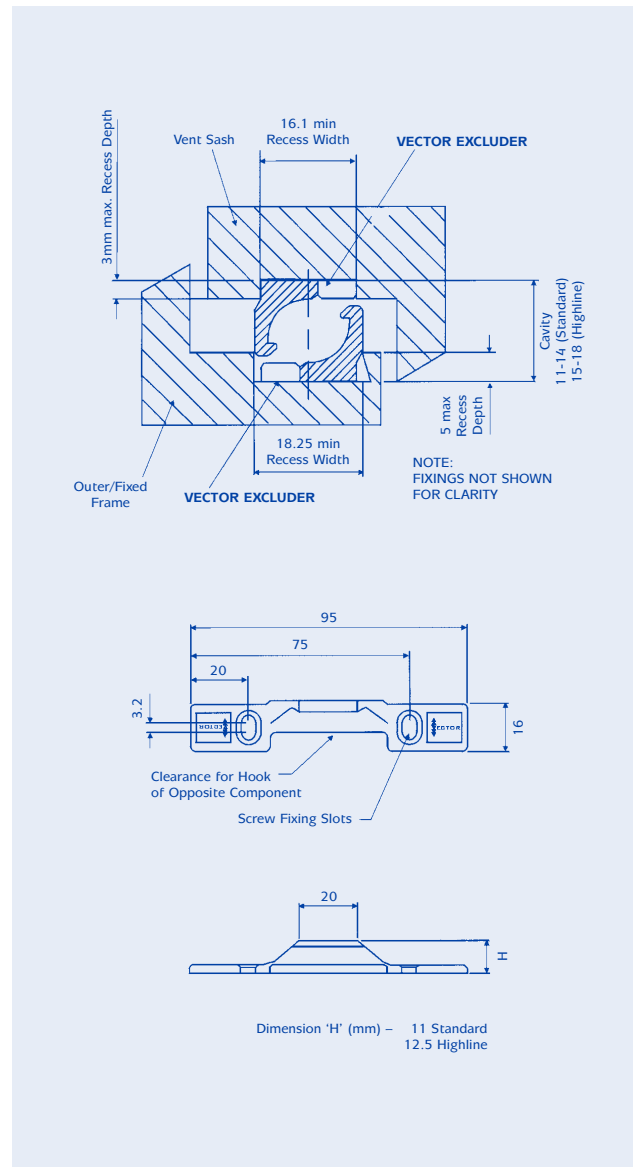

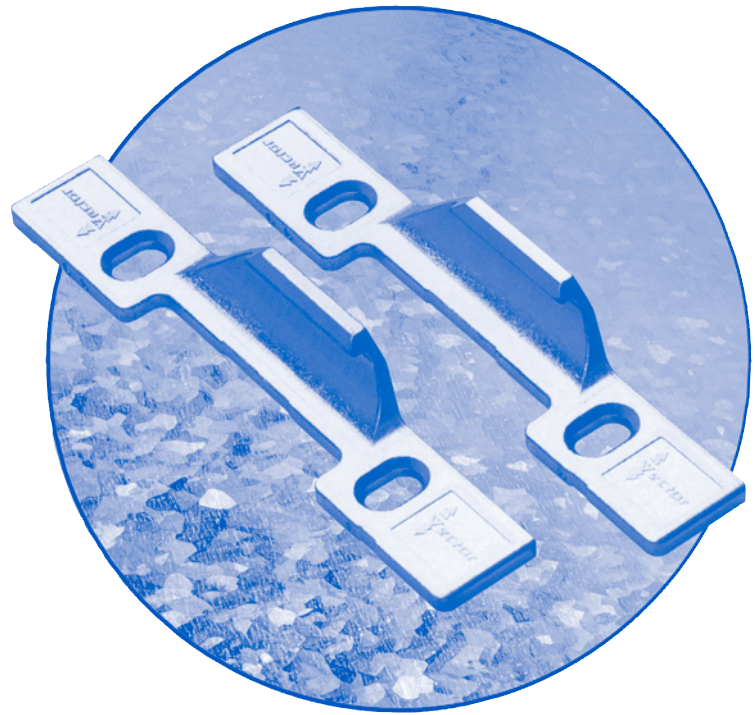

**The Vector Excluder is the ultimate solution to security on the hinged side of a casement window.**

The Vector Excluder can be fitted in conjunction with most Securistyle friction hinges (including Egress) to increase resistance to forced entry on the hinge side of the window. Retro-fitting to existing windows can offer a cost-effective solution to increasing existing levels of security.

The two component parts are designed to not contact each other during the operation of the window, and so do not inhibit its operation.

Manufactured from Diecast Zinc Alloy, plated and passivated to satisfy 500 hours neutral spray test, the Vector Excluder is a cost-effective solution to today's ever increasing trend towards window security.
