

SARACEN DEADLOCK

shootbolt locking mechanism

The Saracen Deadlock may be fitted internally or can be assembled prior to dropping into a eurogroove. An ideal security solution for most casement windows.

Deadlock consists of shootbolts and a unique central gearbox with a deadlock.

All components are profile related and are manufactured from Sylon (part) or die cast zinc alloy.

Shootbolt rods are available in four lengths and are simple to connect to the gearbox with easy to adjust screw thread action to suit any tolerance variations.

The Saracen Deadlock is the ideal solution for eurogroove applications and offers a cost effective solution for window security.

Technical information

Corrosion resistance:	Meets the Requirements of BS EN 1670:2007 Grade 3
Operation:	Tested in excess of 30,000 cycles
Performance:	Tested to meet the requirements of BS7950 on selected window systems*

Material specification

Gearbox:	High strength Zinc Alloy
Bars:	Aluminium tube, plated Mild Steel bar with high tensile Brass bolt end.
Keeps:	Sylon Composite (part) or die cast Zinc Alloy

Product Options

Available with 9.5mm or 11.5mm latch and 20mm or 22mm backset. Rods available in 4 lengths.

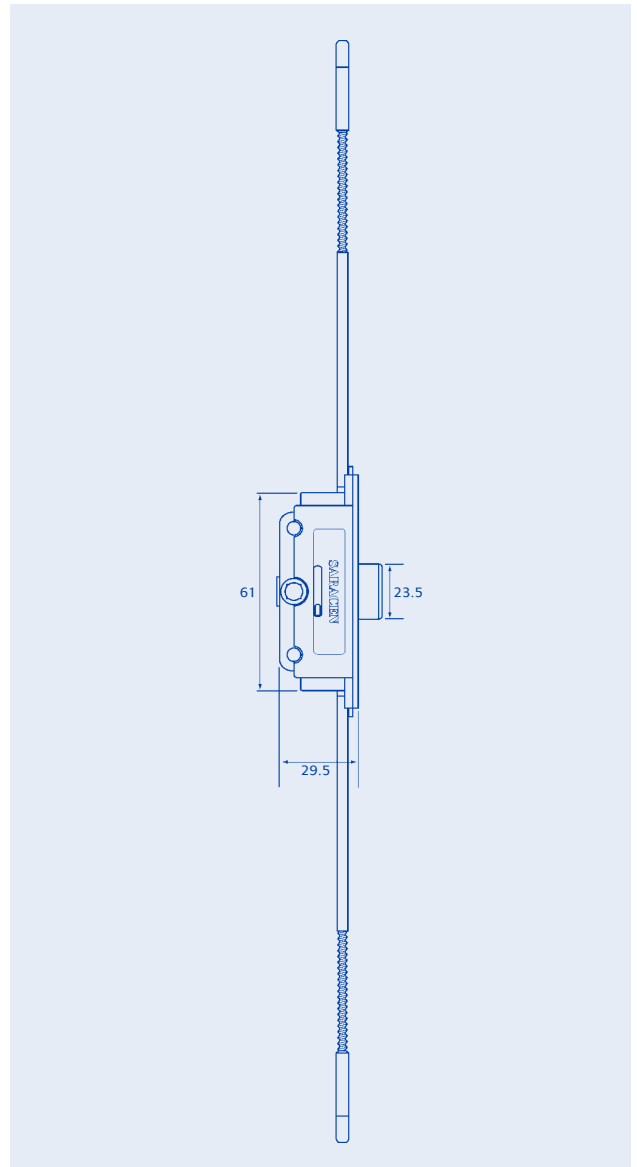

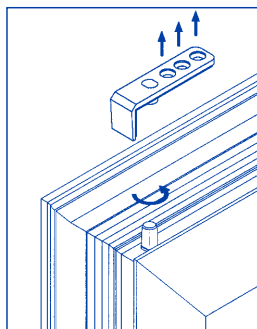

Bar	Min	Max
1	299mm	429mm
2	429mm	689mm
3	689mm	1049mm
4	1049mm	1409mm

See opposite for complete list of product codes.

Final adjustment after window is installed

Remove end guide and adjust rod end by screwing clockwise or anti-clockwise until rod is just touching the outer frame.

This ensures maximum security.
