

S VENT

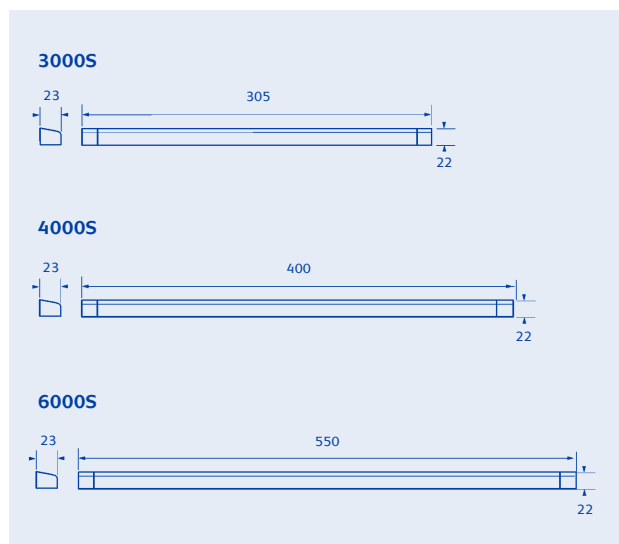

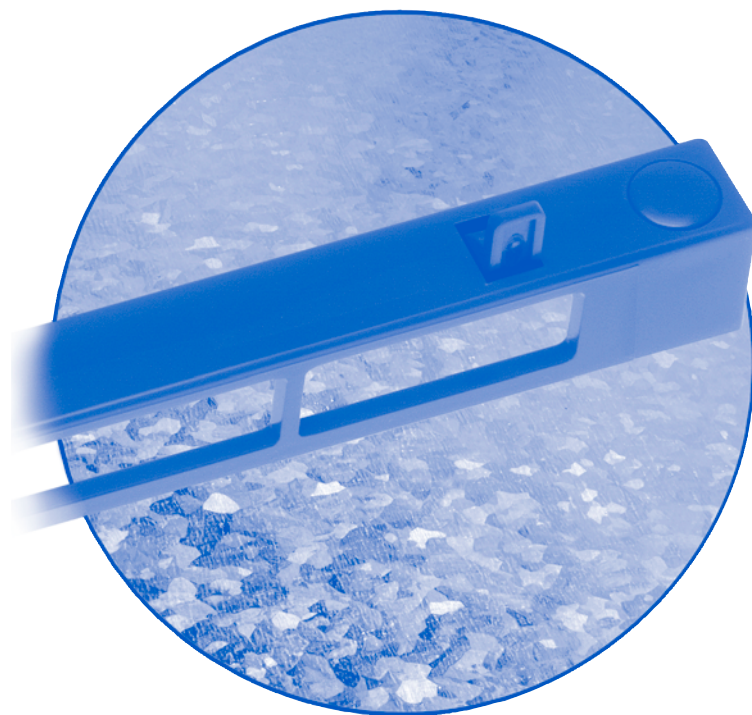

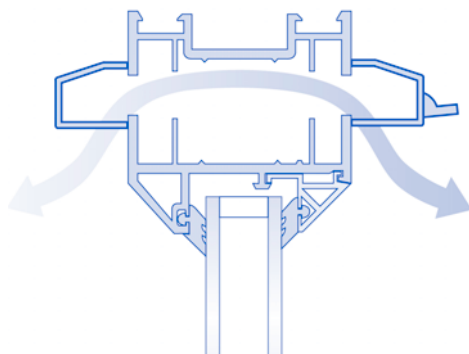

through frame slotvent

Greenwood's S Vent is suitable for all window types, provides trickle ventilation in line with current Building Regulations and is available in 3000, 4000 and 6000 models.

Supplied as a complete package, the internal mechanism has a number of control options including, front, bottom and pull cord operations, ensuring maximum flexibility for the end user. The external canopy is supplied with an integral flyscreen and provides excellent weather protection.

Aesthetically pleasing and manufactured from rigid PVCu, the S Vent is simply screw fixed to the window frame and is supplied with push fit screw covers to conceal fixing points. The S Vent is available in a range of colours and can be supplied with differing internal and external colours. The vent can also be used in conjunction with Greenwood's PVCu Permavent glazed-in Bar Carriers.

An optional sleeve is available for bridging the window frame across the rout.
