

DOOR VIEWER 120°

ref 190/191

To fit a Door Viewer you will require -
a drill, 12.5mm drillbit,
flat blade screwdriver and a pencil.

Easy fitting guide

- A** Select position at eye level in centre of door. Mark position.
Drill a 12.5mm hole through door.
- B** Insert lens through door from outside.
- C** Insert adjustment barrel from inside door and holding lens,
screw adjustment barrel until tight. Use screwdriver if necessary.

Security Tips - we recommended you always view visitors through the door viewer before opening door.
For additional safety we recommend the use of an ERA 791 Door Chain or ERA 700 Concealed Door Chain.

Maintenance - use a moist cloth only, household abrasives or solvents may affect surface finish.

Note - This product is suitable for doors between 35mm and 54mm in thickness.
